		<p><b>AEROMAT 80</b> Sound absorbing ventilator</p> <p>Aluminium housing 80 mm height, 95 mm depth with integrated weather grille. Thermal separation due to PVC insulating profile between the weather grille and the aluminium housing. Face plate made of PVC, anthracite.</p> <p>Closing is achieved by means of a sealing plate pressing against a front panel equipped with lip seals to ensure highly effective sealing. Draughts are completely avoided due to the air inlet across the entire length of the ventilator. The seal compression must be capable of being adjusted subsequently via a set screw.</p> <p>Rod operation can be retrofitted at any time (at an extra charge).</p> <p>Inner insulating material made of special foam, with a non abrasive, coated surface in the channel area. The insulating material can easily be cleaned following removal of the front panel and sealing plate.</p> <p>Aluminium profiles: Al Mg Si 0.5 F 22-25. Surface anodised or powder-coated in accordance with RAL.</p> <p>Provide weather grille with rain-repellant lamella in the appropriate installation situation.</p> <p>Product: <b>SIEGENIA AEROMAT 80</b></p> <p>Type: _____</p> <p>Length: _____</p> <p>with rod: _____</p> <p>Anodised colour: _____</p> <p>Coating RAL: _____</p> <p>Delivery and full installation</p>
