

Operating instructions PSK PORTAL 200-Z PLUS

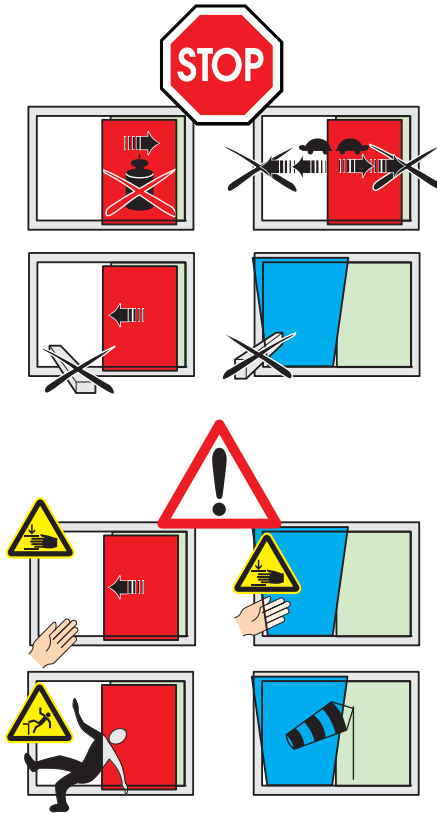

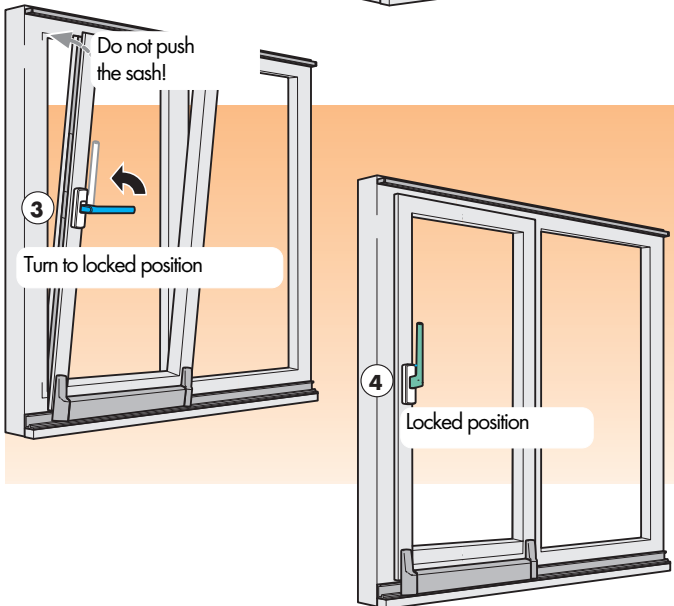

Parallel tilt & slide hardware with handle control

One-handed operation

Tilting the window

Closing the window

⚠ WARNING

Malfunctions can cause injury!

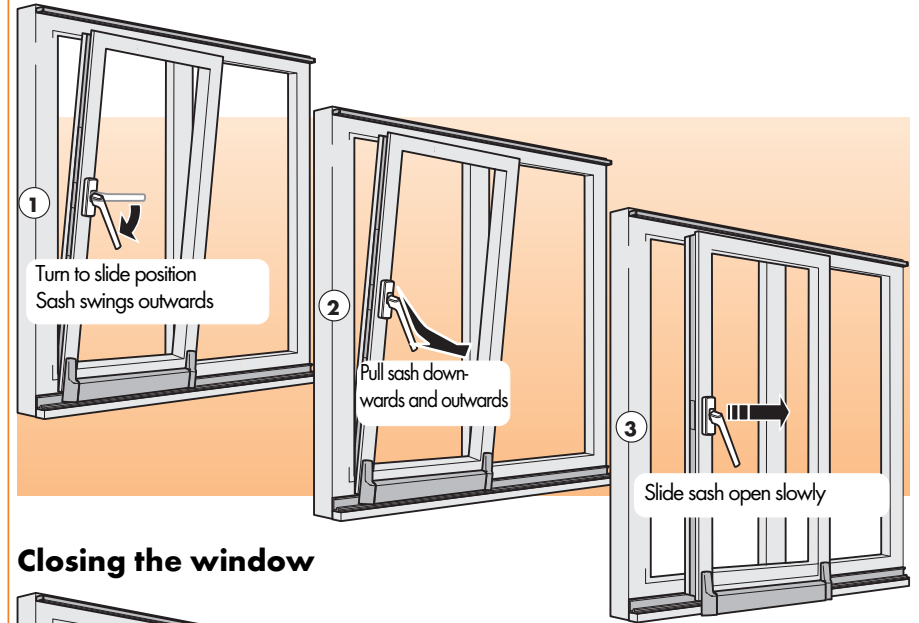

In case of malfunction, **stop** moving the sliding element. **Secure** it and contact a window repair company.

⚠ ATTENTION

Risk of Being Locked Out!

If the sliding element is pushed shut from outside with the handle lying in the horizontal position, the element may lock at the bottom, which means that it can't then be opened from the outside.

Sliding the window open

Closing the window
