

### AS 3600

The multi-point lock AS 3600 is an automatic multi-point lock with two auxiliary boxes, each with a falling bolt, integrated mechanical trigger and a hook bolt.

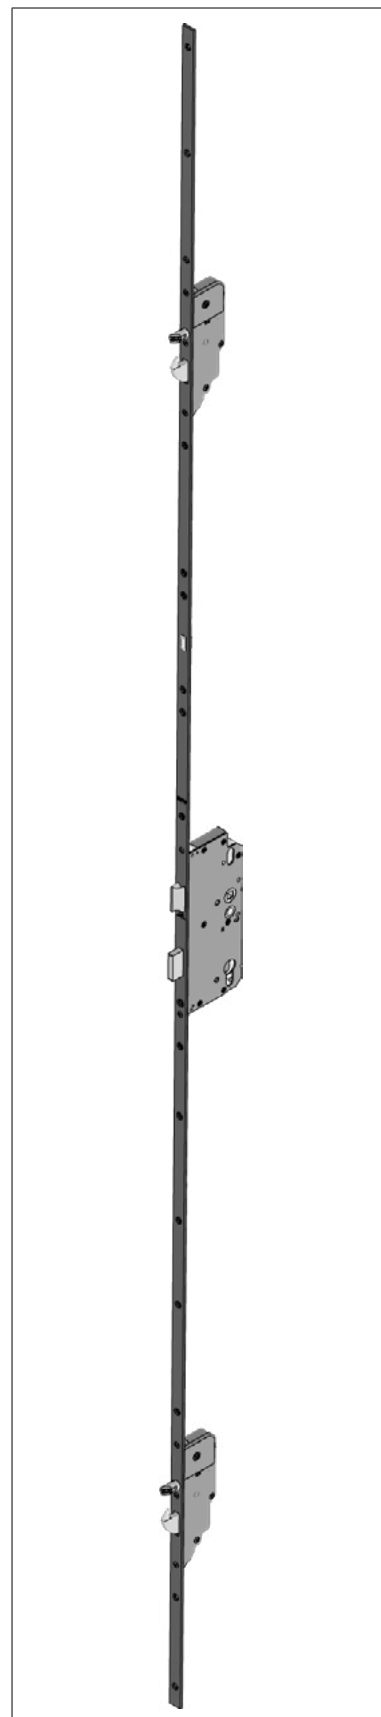

On contact with the frame parts, the two falling bolts activate the locking process and all four locking elements in the auxiliary boxes are extended and retained by counter pressure in the end position. These can be retracted again via the lever handle or key, and then tensioned and locked in place for the next triggering. Moreover, the main lock bolt can be picked via the cylinder to thus block the lever handle.

#### Specification:

- Automatic multi-point locking, key operated, with four locking elements
- Soft lock latch in the main lock and soft lock latch bolts in the auxiliary boxes
- Faceplate: bright zinc-plated steel, grey aluminium coated or brushed matt stainless steel
- Flat face plate in the widths 16, 18, 20, 24 or 30 mm
- U-profile faceplate in 5 x 24 x 5, 6 x 24 x 6, 5 x 30 x 5, 6 x 30 x 6 and 10 x 30 x 10 mm
- Backsets 35, 40, 45, 50, 55, 65 or 80 mm
- PZ dimensions 92 mm (PZ) or 94 mm (RZ)
- Lever handle square pin 8 or 10 mm
- 17.5 mm rear backset
- Cases screwed to faceplate
- Can be used DIN right or DIN left by switching the main lock latch and the falling bolt
- Standard size variants B001 (see table for deviating size variants)

#### Optional:

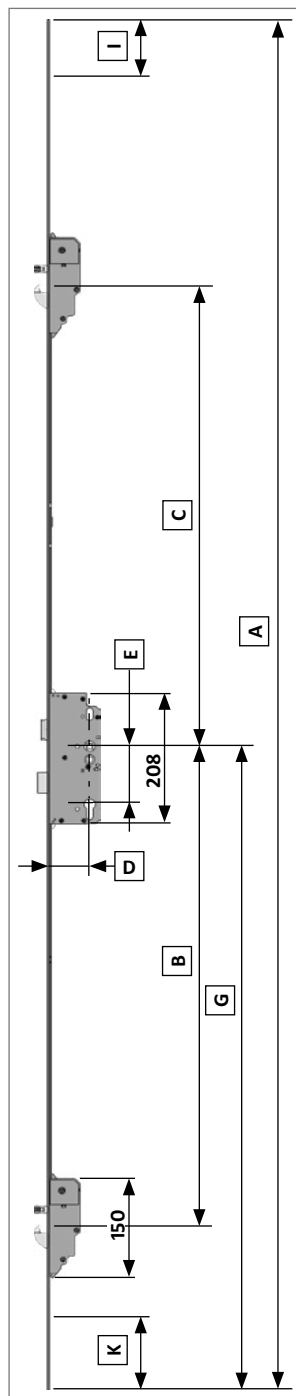

- Safety lock T3 (cannot be operated from the outside, retrofittable)
- Safety lock T4 (only available preassembled from factory, can be operated from the inside and outside)
- Daytime release TA (retrofittable or preassembled in factory)
- A-opener 2.1 (can be retrofitted, electromechanical door opening)
